ANVL-RIPNG-8.2 MUST	RFC 2080 s2.5.1 p14 Triggered Updates															
	RIPng Triggered Updates After a triggered update is sent, a timer should be set for a random interval between 1 and 5 seconds. If other changes that would trigger updates occur before the timer expires, a single update is triggered when the timer expires. (Note : In this test we check that the time difference between two successive RIPng triggered updates is within the range of 1 - 5 seconds)
